

NEW Formulation Cut-N-Seal®

Wood preservative for cuts, holes, and injuries in pressure treated wood

The preservative manufacturer of Canada's most successful treated wood product, MicroPro Sienna, is excited to introduce a NEW addition to our family of products – **Cut-N-Seal Wood Preservative**.

After 13 years of cumulative data and a lengthy PMRA registration process, finally a brush-on end cut wood preservative with NO solvents! Designed to protect cuts and drill holes in pressure treated wood that expose untreated wood, an application of Cut-N-Seal restores the integrity of the wood's original treatment. There are no equals in the Canadian marketplace.

Features and Benefits

- Canada's ONLY government registered copper-based, waterborne end cut wood preservative
- Protects end cuts against rot and decay in above ground applications
- Similar chemistry and innovative pigment technology as used for MicroPro Sienna
- Cedar brown colour closely matches MicroPro Sienna Treated Wood
- Low VOC, low odour
- Validates MicroPro Sienna Treated Wood Warranty
- Easy soap and water clean-up, NO solvents needed
- Provides retailers with MicroPro Sienna product continuity
